DETAILED ACTION

1. The terminal disclaimer filed on 21 January 2005 have been received and entered.

Claims 1-25 are pending in the application.

Allowable Subject Matter

2. Claims 1-25 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention teaches a method of providing prerequisite information regarding pages of a graphical user interface that are prerequisites to other pages of the GUI using an object-oriented technique. Each independent claim identifies the distinct feature of in response to a request to a destination page, instantiating a container object and identifying the prerequisites of the sub-components of the page by invoking an execution of a method of the container object, the container object determines whether the prerequisites have been satisfied by invoking a method of the respective sub-component object and displays the sub-components to stream out those information to the container object. The closest prior art, O'Connell U.S. Patent 5,991,882, teaches a method of displaying questions that are prerequisites to subsequent questions, prompting the user to input an answer before subsequent questions are displayed. Specifically, O'Connell teaches the display of pages, or separate sequential screens of questions that must be answered correctly in order to display the next question. The prior art fails to teach the object-oriented technique of in response to a request to a destination page, instantiating a container object and identifying the prerequisites of the sub-components of the page by invoking
